

Season's Greetings

As another year comes to an end, the team at GE Energy Consulting thanks you for your continued business, collaboration, partnership and support. We look forward to working with you and your organization in the years to come.

Happy Holidays from all of us at GE Energy Consulting.

Sincerely,

Beth LaRose
General Manager, GE Energy Consulting

News & Insights

Sudipta Dutta

Senior Engineer –
Power Systems Operation
& Planning

GE Energy Consulting

The Power of our People

For nearly a century, GE's Energy Consulting business has harnessed the Power of our People to provide customers and partners with innovative power industry solutions. Meet **Sudipta Dutta**, *Senior Engineer* with the Power Systems Operation & Planning team, who is focused on providing expertise and insights on renewable energy resource planning, integrations and enabling the interconnection of inverter-based resources such as wind plants, solar plants, and BESS with power grids. For more details and to connect with Sudipta, visit geenergyconsulting.com today.

Save the Date! GE PSLF* User Group Meeting 2020

The annual **GE PSLF User Group Meeting** is scheduled for **April 28-29, 2020** in **Denver, Colorado**. If you're interested in presenting at this year's meeting OR have topics you would like to learn more about, please share that information with us on our registration survey page. Meeting agenda, venue + hotel accommodations, and additional details will be available in early 2020. To register online, visit geenergyconsulting.com today.

The banner features the GE logo in the top left corner. Below it, the text 'Energy Consulting' is displayed in white on a blue background. The main title 'GE PSLF User Group Meeting' is prominently displayed in large white letters. At the bottom, the dates and location 'APRIL 28-29, 2020 | DENVER, CO' are shown in white on a blue background. The background of the banner is a stylized cityscape with a grid overlay.

“100% Carbon-Free Systems” Workshop

Members of the GE Energy Consulting team were honored and proud to share insights with fellow industry colleagues and partners at the New York ISO on December 5 during the **“Experiences on the path to 100% carbon-free systems” Workshop**. This educational session highlighted a variety of challenges and opportunities with renewable technologies

and energy resources that system operators are factoring in planning for the grid of the future. For more information on this workshop, visit geenergyconsulting.com.

“Grid Stability” On-Demand Webinar Available

Australia's adoption of renewable energy is creating challenges for reliable power, but there's a solution. Join GE's specialists to learn more and discover the key challenges. Our webinar “Grid Firming: Is Australia Prepared?” is now available on-demand. Visit ge.com/power to access the webinar today.

Looking for R&D resources with Distributed Energy challenges?

Check out GE's DSTAR Consortium today. The **DSTAR Consortium** and its member utilities have been at the forefront of developing distributed energy planning strategies and tools for more than 30+ years. DSTAR has provided its members results that are

directly applicable to everyday distribution design, planning, engineering, operations, and maintenance. For more information and to see what has been accomplished by the DSTAR consortium for the industry, visit geenergyconsulting.com/insights/DSTAR today.

Education & Training

GE Energy Consulting is proud to offer a variety of power systems, engineering and software courses for our customers and users. We're happy to share the **GE PSLF** course offerings for 2020 that are now available online. Visit geenergyconsulting.com/education/pslf-training-2020 for more information and registration details.

If you're looking for your next professional development course or in the market to plan a training for your team and organization, contact GE Energy Consulting to **TAILOR** your own training program by visiting geenergyconsulting.com/education today.

GE Energy Consulting

For nearly a century, a core group of leading GE technical and business experts has focused its energies on solving the electric power industry's most pressing challenges -

driving the evolution of electric power systems with greater affordability, reliability, and efficiency. Today, GE's Energy Consulting team continues this tradition by providing innovative solutions across the entire spectrum of power generation, delivery, and utilization. With our cross-company resources, GE's Energy Consulting business can serve a diverse global client base with a strong local presence.
