

Anark Core MBEWeb

GE Gas Power

July 22, 2020

History

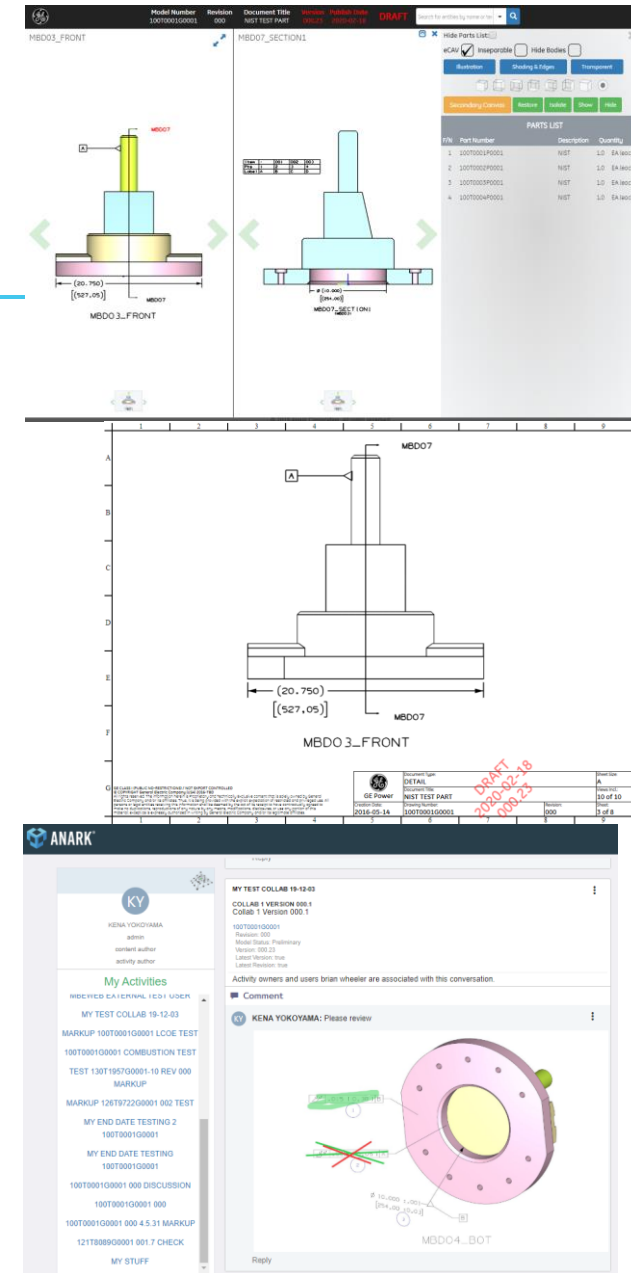

Date	Author	Description of Changes	Revision
1/17/20	Kena Yokoyama	Initial Release	1.0
2/26/20	Kena Yokoyama	Updated Why Anark Core MBEWeb slide	1.1
5/28/20	Kena Yokoyama	Updated for Production MBEWeb External	1.2
6/22/20	Kena Yokoyama	Updated for posting to external Supplier website	1.3

Why Anark Core MBEWeb?

3D-PDF to Anark Core MBEWeb

Feedback	3D-PDF Status	Anark Core MBEWeb Capability
Files too big	3MB-1.2GB download	Preview & navigate w/o full download
Navigation too slow	Slower the bigger the file	10x+ faster, 2D option
Can't search	Not in our template	By PMI type, text, point name, eCAV Balloon #, Rev Triangle
Can't open on my device	Computers need Adobe Reader XI	Viewable on business computer, tablet, smartphone
Difficult to navigate	1 view at a time	Side by side w/ hyperlinks, thumbnails, search
Too much paper	1 view per sheet	Flexible # of views/order, MBD Layout
Printing too slow	1 page at a time	Printing now from saved 2D images
Markups impossible	Tedious	Collaborative, searchable, 2D option
New functionality	Need to republish	New functionality quickly applied to content w/o the need to republish
Support documents	Posted on Box	Linked in content and collaboration

Allowed Data

- GE Internal Users and External Supply Chain users.
- **Class II Non-Export Controlled** content only. Restricted Class II such as PSM and Class III **are allowed**. Class IV and Export Controlled **are not allowed** in Anark Core MBEWeb.
Markups, comments and pictures added to Anark Core MBEWeb Collaboration must not include Class IV or Export Controlled information.
- **PLM/SDX Access and an Active PO, RFQ or SDX folder are required.** Because the content translated into Anark Core MBEWeb is managed by PLM, Anark Core MBEWeb access authenticates in PLM. If you have access to the CAD model and can download the 3DPDF from PLM/SDX, you will have access in Anark Core MBEWeb.

Accessing Anark Core MBEWeb

Content link in the PDDR for each Model-Based CAD Model

Anark Core MBEWeb Content

- Title block including name, rev, description, date published to Anark Core MBEWeb, classification, export status, copyright.
- ? Link to Help Documentation
- Search to filter to views that contain the searched content
- Quick Print to print to physical printer or 2DPDF
- Thumbnails for quick browsing. Click on a thumbnail to open the 3D interactive view
- Show 2D to navigate with slower connections

The screenshot displays the GE MBEWeb interface for a CAD model. At the top, there is a header with the GE logo and metadata: Model Number 100T0001G0001, Revision 000, Document Title NIST TEST PART, Version 000.23, Publish Date 2019-12-17, and a DRAFT status. A search bar and a 'Quick Print' button are also visible. Below the header, the document is identified as 'GE CLASS I (PUBLIC NO-RESTRICTIONS) / NOT EXPORT CONTROLLED' and '© COPYRIGHT General Electric Company (USA) 2016-TBD'. A disclaimer states that the information is proprietary and technically exclusive content owned by GE. The main content area shows a 3D model of a component labeled 'MBD01 PRIMARY' with a 'Show 2D' button. To the right of the model are 'NOTES' and a table of datum views. The 'NOTES' section contains seven numbered items detailing CAD model definitions, material references, and manufacturing practices. The datum view table lists D (MBD06_ISO), C (MBD05_TOP), B (MBD04_BOT), A (MBD03_FRONT), and DATUM (MODEL VIEW). Below the 3D model is a revision table with three entries: MBD01 (LEGEND), MBD05 (REVISED), and MBD06 (APPROVED). To the right of the revision table is a 2D cross-sectional view of the component, and further right is a 2D top-down view of the component's circular base with various dimensions and features labeled.

REV	MBD VIEW	DESCRIPTION	DATE (YYYY-MM-DD)	APPROVAL
	MBD01	LEGEND	2016-03-17	OSAMU K. TOKOYAMA ENGINEER
	MBD05	1) REVISED		
		2) APPROVED		
		3) REVISED		

D	MBD06_ISO
C	MBD05_TOP
B	MBD04_BOT
A	MBD03_FRONT
DATUM	MODEL VIEW

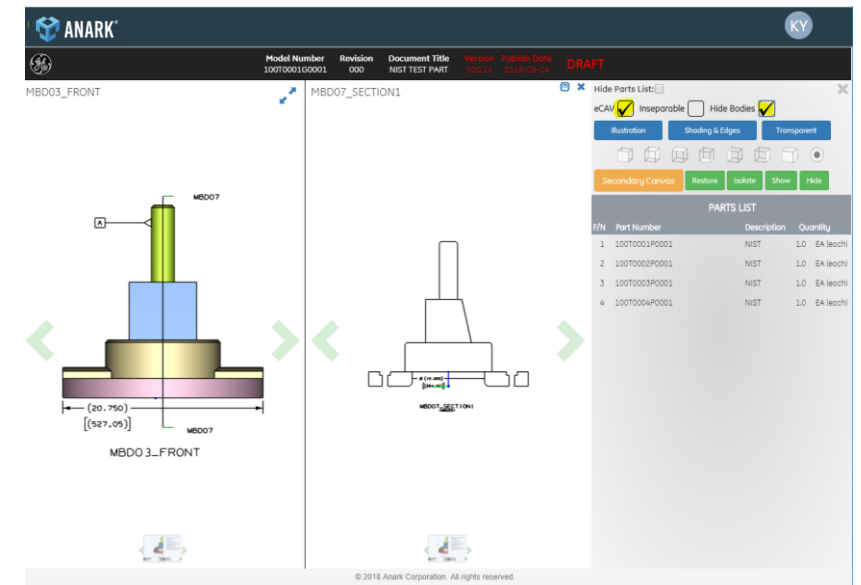

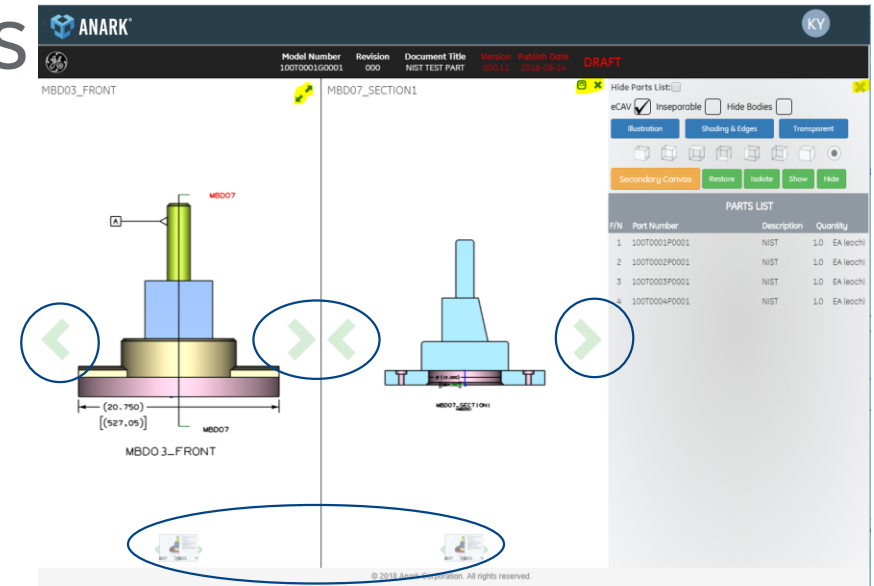

Anark Core MBEWeb 3D Views

- Arrows, Xs and buttons to navigate, open/close, expand/reduce, show/hide, orient and change display mode for views, bodies, background geometry, eCAV balloons
- X in upper right corner to return to thumbnails
- Secondary Canvas to open side-by-side views
- MBD and See Note Hyperlinks to open related section view, parent view, notes view in secondary canvas
- Select PMI to highlight associated objects just like in 3DPDF. Select eCAV balloons to highlight related PMI and referenced geometry.

- Select from parts list to highlight listed component
- Rotate the view with the right mouse button, zoom in or out with the scroll button and pan by holding down the scroll button.

List of Activities

Activity Feed, includes activities, conversations and comments, newest to oldest.

GE will invite External Supply Chain users to collaborate

Get Help

Training Video

- <https://www.ge.com/power/about/suppliers>

Includes MBEWeb Training video and how get access to PLM/SDX

Future Updates

- Streamlining collaboration workflows and email notifications (2020)
- Integration with new PLM version (2021)
- Measurement capability (2021)

Please provide feedback

- What is working, not working?
- What recommendations do you have?
