**NOTIFICATION**  
 on specification of products (goods)  
 containing encryption (cryptographic) aids

1. Goods (products) description:  
 Controller (minicomputer), brand GE, model:  
 UCSA.

2. Goods (products) function:  
 The product is an industrial controller, a minicomputer intended for information exchange with external I/O devices via integrated hardwired network interfaces. The product performs its functions within a pre-installed operating system (hereinafter — OS) QNX Neutrino (version: RTOS). The product performs cryptographic functions within the framework of equipment, the functions and purpose of which may not be modified by user and being the components of pre-installed QNX Neutrino OS (version: RTOS).

3. Goods (products) manufacturer details:  
 Description: General Electric Drivers and Controls Inc., USA.  
 Address: 1501 Roanoke BLVD RM141, 24153-6422 Salem VA, USA.  
 Phone/Fax: +1 5403878372.

4. Applied cryptographic algorithms:

No.	Cryptographic algorithm	Item number of Appendix 1 to Encryption Tools Import and Export Procedure
a)	Symmetrical block encryption algorithm DES, maximum cryptokey length: 56 Bits Encryption within operating system: QNX Neutrino (version RTOS).	3
b)	Cryptographic hash algorithm MD4, maximum cryptokey length: 128 Bits Encryption within operating system: QNX Neutrino (version: RTOS).	3
c)	Symmetrical block encryption algorithm AES, maximum cryptokey length: 256 Bits Encryption within operating system: QNX Neutrino (version: RTOS).	3
d)	Online encryption algorithm ARC4, maximum cryptokey length: 2048 Bits Encryption within operating system QNX Neutrino (version: RTOS).	3
e)	Block encryption algorithm CAST6, maximum cryptokey length: 256 Bits Encryption within operating system: QNX Neutrino (version: RTOS).	3

5. Any functionality of goods (products) not described in operational documents presented to user: none.

6. Notification valid until December 31, 2020.
