

Electrical Product Line

fact sheet

GEH Electrical Parts offers a wide range of low and medium voltage electrical distribution equipment, safety and non-safety as required.

Our Portfolio

- Relays and switches
- Molded case circuit breakers
- Low voltage switchgear and breaker parts
- Medium voltage switchgear and breaker parts
- Low voltage motor control centers and bucket replacements
- Transformers, meters, heaters, power supplies, and more

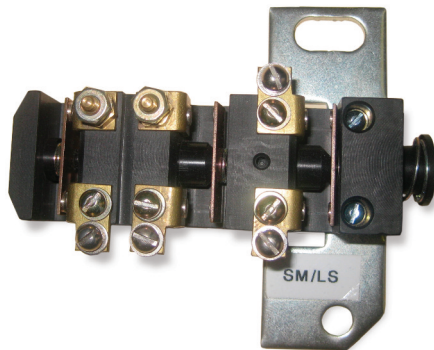

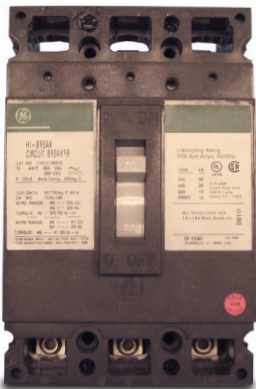

Our Solutions

- Part equivalency
- Obsolescence solutions
- Low and medium voltage breaker refurbishments
- Outage support

Our Commitment

- **Quality.** In response to NUPIC recommendations, we take the extra steps of special test and inspection on many safety-related electrical parts. Even on non-safety parts, you have the added assurance that we visually inspect every piece before we ship to ensure no foreign material or detrimental contaminants are present.
- **OEM Intellectual Property.** GEH owns the Class 1E qualification on GE parts and has in-depth knowledge of components critical to the qualification of assemblies. This knowledge also protects against suspect and counterfeit parts.
- **Innovative New Products.** We are actively investing in Class 1E qualifications of the latest generation GE electrical equipment. Please contact us for specific details or with any interests or unique requirements.
