

IVVI Remote Inspection Tooling

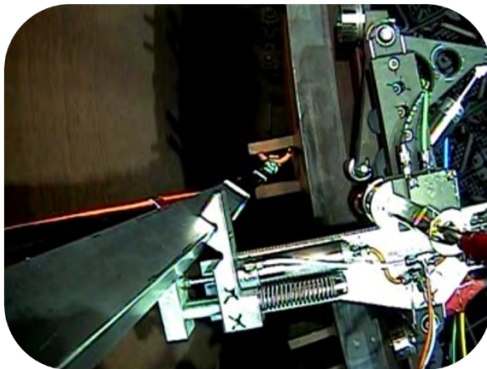

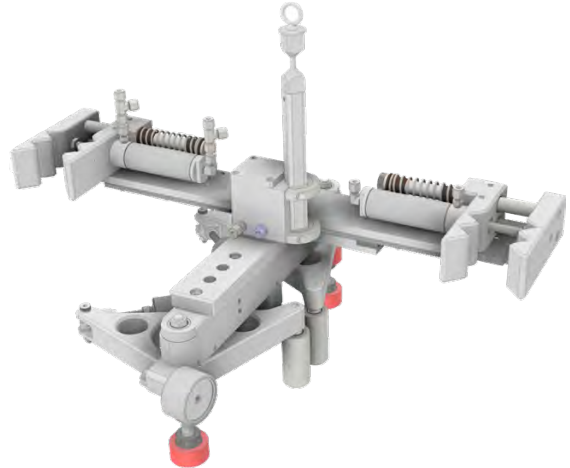

GE VERNOVA

HITACHI

Fact Sheet

Mantis Positioning Tool

In nuclear power, safety and precision are non-negotiable. Our Mantis tool revolutionizes weld inspections by eliminating the need for cranes or heavy rigging. Lightweight, remotely operated, and designed for hard-to-reach areas it delivers high quality stable exams without disrupting refueling operations.

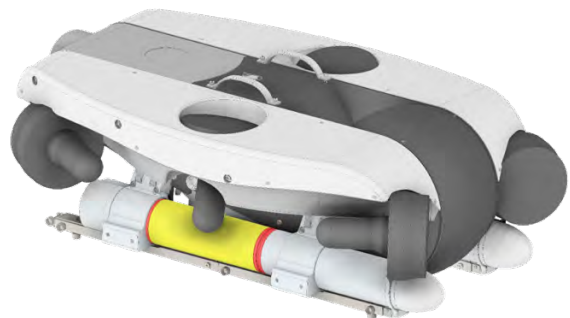

Numerous Attachments:

- Water washing
- Deep In-Vessel Examination (DIVE) Tool
- Over the Core (OtC) Tool
- Over the Dryer (OTD) Tool

Visual Inspection Sub System (VISS)

Remotely operated Deep Trekker sub that performs all internal Dryer exams including dryer banks. The sub system has two independently operated Manual focus/zoom cameras.
