Discontinue service activities of minimum-oil circuit breakers and disconnectors

Dear Ladies and Gentlemen

For decades we were able to sell a large number of our Circuit Breakers and Disconnectors around the world. The voltage series 72kV to 420kV were used very successful from customers.

We would thank you for the trust you placed in our products, in us and for the good cooperation over the past years.

After more than 50 years, we decided the service activities for the following devices starting from 01 January 2016 to adjust:

- Circuit breaker: HPF 500A, HPF 500B & HPF 312 including their drives
- All Disconnectors with the label "Sprecher & Schuh"/ "Sprecher Energie" (TSFxxx, TPFxxx, TVFxxx, TKFxxx, THFxxx, TYFxxx & TZFxxx) including their drives.

For any questions please do not hesitate to contact us. On another good cooperative collaboration we look forward!

Yours sincerely

GE Grid (Switzerland) GmbH
