## CGVB-08

## Vertical Break Disconnect Switch From 25 kV to 345 kV

Grid Solutions' disconnect switches are the result of more than 75 years of experience in developing high-voltage switches that have proven their reliability in the scorching climates of Arizona (USA), Australia, and Sudan; in the extremely cold territories of Canada, Russia, and Sweden; in the tropical weather of Panama, Indonesia, Malaysia, and Venezuela; and in regions with intense seismic activity such as Chile and California (USA).

## Switch It, Switch It Good!

The CGVB-08 vertical break disconnect switch is available in a wide range of ratings and is a robust and reliable performer.

The double jaw contact system ensures low maintenance, long life, and excellent electrical and mechanical performance in the most adverse operating conditions such as high wind, ice, and seismic activity.

## Customization

Grid Solutions experts can propose customized solutions for different layouts to meet specific project needs.

## Enhanced Installation and Maintenance

The CGVB-08 vertical break disconnect switch does not require any special tools for installation, adjustment, or maintenance. Due to factory-sealed bearings, life-time greased or self-lubricating parts and corrosion-free materials, the CGVB-08 is virtually maintenancefree.

## Certification

All Grid Solutions' disconnect switch manufacturing sites worldwide are certified according to ISO 9001, ISO 14001, and OHSAS 18001. Grid Solutions designs, manufactures, tests, and delivers its disconnect switches in accordance with the latest IEEE/ANSI standards.

## Optional Devices

The CGVB-08 can be fitted with integrated grounding switches, mounted either parallel or perpendicular to the disconnect switch blade travel. In addition, it can also be fitted with a wide range of accessories including, but not limited to, high-speed whips, silver inlaid contacts, interlocking mechanisms, and auxiliary contacts.

## Main Characteristics

- Up to 4,000 A
- Up to 80 kA/3 s
- Temperatures from $-50^{\circ} \mathrm{C}$ to $50^{\circ} \mathrm{C}$
- Ice up to $20 \mathrm{~mm}\left(3 / \mathrm{m}^{\prime \prime}\right)$

## Customer Benefits

- Reduced phase-spacing requirements
- Virtually maintenance-free
- No special tools required
- Wide range of accessories available
- Customization to meet specific needs

## 25 TO 245 kV 1,200-3,000 AMP.

## Quality

Grid Solutions prides itself on being the leading supplier of disconnect switches in the world.

Our design principles, the technical knowhow and experience of our experts, and the careful selection of our suppliers to ensure that only top quality materials are used during production, guarantee an excellent life cycle.

Customized layouts available upon request. Phase-to-phase distance defined by substation layout.
