

**6.06 TO 6.07(Aug 22,2001)**

1. Further enhanced settings file up/download functionality by streamlining PC-to-relay communications

**6.05 TO 6.06 (February 22, 2000)**

1. Enhanced settings file up/download functionality through more descriptive on-screen messages

**6.04 TO 6.05 (June 28, 1999)**

1. Added Modbus/TCP support. Configuration can be accessed through the *Communication/Computer* menu
2. Site Setup has been added to the modem dialog box. This allows the user to add names to identify device slave addresses at each site
3. Added the option to hide the prompt for confirmation messages after storing setpoints. This option is accessible through the Menu bar at "Confirm Store Operations".
4. Modem Redial Timeout maximum range has been changed to 120 seconds from 60 seconds
