### New feature

#### **N Implemented PRP**

Parallel Redundancy Protocol

### General improvements

#### **F Fixed the unit to LB01 in French in the user log**

Fixed user log on French language from "dc" to "Vdc" after user changing voltage from digital board.

#### **F Static Code Analysis**

Fixed several issues reported by static code analysis tool.

### Cyber Security improvements

#### **F Cyber Security issues**

Fixed issues reported by Pentest and other CS tools.

## Appendix

### Change categories

This document uses the following categories to classify the changes.

**Table 1: Revision Categories**

Code	Category	Comments
<b>N</b>	New feature	A separate feature added to the product. Changes to existing features even if they significantly expand the functionality are not in this category
<b>G</b>	Change	A neutral change that does not bring any new value and is not correcting any known problem
<b>E</b>	Enhancement	Modification of an existing feature bringing extra value to the application
<b>F</b>	Fix	Changes to fix an issue with existing functionality.
