Software 2.8.0 is compatible with all firmware and hardware versions.

Please contact your local sales representative or Grid Automation Global Contact Center for any questions regarding this upgrade.

Release details

In the following release descriptions, a revision category letter is placed to the left of the description. Refer to the Appendix at the end of this document for a description of the categories displayed.

New feature

N Inclusion of PRP redundancy

Inclusion the option to configure the device to Parallel Redundancy Protocol.

General improvements

F Fix serial communication with the DR60 Configurator

This issue fixed the communication between the device and the DR60 Configurator.

Appendix

Change categories

This document uses the following categories to classify the changes.

Table 1: Revision Categories

Code	Category	Comments
N	New feature	A separate feature added to the product. Changes to existing features even if they significantly expand the functionality are not in this category
G	Change	A neutral change that does not bring any new value and is not correcting any known problem
E	Enhancement	Modification of an existing feature bringing extra value to the application
F	Fix	Changes to fix an issue with existing functionality.
