MDP Link PC Setup Program Installation Instructions

1. Create a MDP directory on your hard drive and download the self-extracting zip file MDPPC_1.EXE (DISK1).

2. From the Windows Program Manager menus, select Program/ Run and type in MDPPC_1.EXE along with the complete path (i.e. C:\MDP\MDPPC_1.EXE) to extract all the install files.

3. To start MDP Link PC, run the MDPLINK.EXE file in the MDP directory. For additional instrucions and information, open the README.TXT file in the MDP directory using a text editor.

4. After the installation is complete, it may be a good idea to copy the installation files to floppy disks. Perform this task by copying all the files except MDPPC_1.EXE from the mdp directory to the first disk. Label this disk "MDP Link PC disk 1".
