Release Notes

Date: **25 September 2025**   Distribution: **Public**   Reference: **H49-FW-RN-EN-1**

H49 switches

Release Notes

References

Publication number	H49-FW-RN-EN-1
Firmware Release	H49-2.1.0
Release date	25 September 2025

Key New Features

- New firmware running on a recent operating system fixing the vulnerabilities of the firmware prior to version 2.1.0

Cybersecurity improvements

- This version provides cybersecurity improvements for the product
- SSH protocol disabled by default
- SNMP is disabled by default. When SNMP is enabled, it will have read-only permissions by default.

Notable bug fixes

- Fixed issue with local time setting on Global Settings page
- Fixed issue with SNMP disabling in Web UI

Hardware compatibility

Compatible with all H49 hardware

Upgrade procedure

To upgrade the H49 product from a release prior to h49-2.1.0, follow the process below:

1. Download the H49 configuration files.
2. Upgrade first to previous firmware release version h49-2.0.3.1, if it is not yet your current version.
3. Upgrade to h49-2.1.0.
4. DO NOT CHECK the option "Check this box if you want to save the configuration before upgrading the firmware."
5. After the firmware upgrade, power off then power on the H49 product.
6. Restore your H49 configuration file.
