

## **GE Vernova inaugurates its first repair center for enhanced aero-derivative gas turbine support in southern Latin America**

- A new GE Vernova repair service center has opened in Argentina to support outage needs in Argentina, Brazil, Chile and Uruguay
- Lean methodologies will help improve lead times for delivering aero gas turbines components
- Project aligns with GE Vernova’s plans to expand gas turbine repair capabilities worldwide

**Neuquen ARGENTINA** (October 23, 2025) - GE Vernova Inc. (NYSE: GEV) today celebrated the opening of a new Repair Service Center in the Parque industrial Centenario, in the Neuquén Province, Argentina. The new facility marks GE Vernova’s first repair center for GE Vernova’s Aeroderivative business in Latin America and is expected to boost repair capabilities for GE Vernova’s aero derivatives gas turbines fleet based in Argentina, Brazil, Chile and Uruguay.

Owners of aero derivative gas turbines in these countries can benefit from significant improvements to lead time and delivery of repaired components in support of their outage needs. Aero derivative gas turbines will no longer need to be shipped to a repair center outside of Latin America, which may result in substantial reduction - which can be up to a year - of component delivery times.

“This project is aligned to GE Vernova plans to expand its gas turbine repair capabilities globally,” according to [Luis Leal](#), **General Manager Aero Services Americas, Gas Power GE Vernova**. “By applying lean practices and advanced repair technologies, our Repair Service Center in Centenario can set a new benchmark for repair excellence. The new facility will help us to better serve our

customers and ensure that our legacy equipment remains competitive, while effectively addressing the support and maintenance needs throughout southern Latin America.”

This facility will initially offer LMS100\* maintenance services and is planned to expand its capabilities to include LM2500\* and LM6000\* gas turbines solutions by the end of 2026. By providing maintenance locally, GE Vernova will help alleviate import and export bottlenecks that have historically affected turnaround times.

With approximately 6,600 employees in Latin America, GE Vernova is serving its customers by providing solutions to help deliver a more affordable, reliable, sustainable, and secure energy future.
