

GE Vernova to supply workhorse wind turbines for Santa Maria de las Fuentes Wind Farm in Spain

MADRID, SPAIN (April 20, 2026) - GE Vernova Inc. (NYSE: GEV) announced today that it has signed an agreement to provide 15 of its 6.1 MW-158m* workhorse wind turbines to power the Santa Maria de las Fuentes wind farm in Spain, developed by Renovalia. The deal, which was booked in the fourth quarter of 2025, further strengthens GE Vernova's commitment to supporting Spain's transition to renewable energy.

Spain has a goal of installing 62 GW of wind in the country by 2030, part of its plan to generate over 80 percent of its electricity from renewable resources by the end of the decade.

GE Vernova has a strong presence in Spain, accounting for approximately 6 GW of the country's wind capacity. The company also maintains a significant manufacturing footprint in the region, including facilities in Toledo, Ponferrada, and Castellón, as well as an engineering center of excellence in Barcelona, all of which play a critical role in supporting the European wind market.

Gilan Sabatier, GE Vernova's Chief Commercial Officer of onshore wind, international markets, said, "We are pleased to announce this latest agreement for the Santa Maria de las Fuentes wind farm. Our workhorse turbines are well-suited to the wind conditions found across Spain, providing the reliability and performance necessary as our customers look to meet rising energy demand, bolster energy security, and achieve ambitious decarbonization targets."

José Manuel Olea, CEO of Renovalia, said: "The Santa María de las Fuentes wind farm represents another significant step forward in our vision to be a leading platform in the renewable energy sector. This partnership with GE Vernova allows us to implement advanced technology that optimizes clean energy production while contributing to the stability of the national grid. We remain committed to developing projects that not only meet environmental targets but also drive

economic growth and sustainability in the regions where we operate.”

The Santa Maria de las Fuentes project joins a growing list of Spanish wind farms utilizing GE Vernova’s 6.1 MW platform, which is designed to provide high-quality, affordable, and sustainable renewable energy at scale.

GE Vernova's Wind segment has a total installed base of approximately 59,000 turbines and more than 120 GW of installed capacity worldwide. Committed to its customers' success for more than two decades, its product portfolio offers next-generation high-powered turbines that support global decarbonization efforts.

About GE Vernova

GE Vernova Inc. (NYSE: GEV) is a purpose-built global energy company that includes Power, Electrification and Wind segments and is supported by its accelerator businesses. Building on over 130 years of experience tackling the world’s challenges, GE Vernova is uniquely positioned to help lead the energy transition by continuing to electrify the world while simultaneously working to decarbonize it. GE Vernova helps customers power economies and deliver electricity that is vital to health, safety, security, and improved quality of life. GE Vernova is headquartered in Cambridge, Massachusetts, U.S., with approximately 85,000 employees across approximately 100 countries around the world. Supported by the Company’s purpose, The Energy to Change the World, GE

Vernova technology helps deliver a more affordable, reliable, sustainable, and secure energy future.

GE Vernova's Wind segment is focused on delivering a suite of wind products and services to help accelerate a new era of energy by harnessing the power of wind. Technologies provided to customers include the next generation high efficiency 3-megawatt onshore wind turbine and the Haliade-X offshore wind turbine platform, as well as maintenance solutions and life extension optionality.

Forward-Looking Statements

This document contains forward-looking statements – that is, statements related to future events that by their nature address matters that are, to different degrees, uncertain. These forward-looking statements often address GE Vernova's expected future business and financial performance and financial condition, and the expected performance of its products, the impact of its services and the results they may generate or produce, and often contain words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “see,” “will,” “would,” “estimate,” “forecast,” “target,” “preliminary,” or “range.” Forward-looking statements by their nature address matters that are, to different degrees, uncertain, such as statements about planned and potential transactions, investments or projects and their expected results and the impacts of macroeconomic and market conditions and volatility on the Company's business operations, financial results and financial position and on the global supply chain and world economy.
